Please note that the recognition extended is simply us deciding that your laboratory can be accepted for the purposes of type testing of certified products. It is not certification or accreditation. It is very important to us that this distinction be preserved at all times.

Please also note the following conditions of your recognition:

1. All test reports must come to us directly from the laboratory, preferably by e mail to the Client Manager. This is to enhance the transparency of our system.
2. We always reserve the right to audit our recognised laboratories at any point in time. These audits are chargeable, and the invoice will be sent to the invoice address on your application form.
3. There is no annual fee attached to this recognition, but the audits as required are chargeable.
4. You may use the recognition in publicity material. Each use must be submitted to us in advance for approval. There is no charge for the use or for the review of the use.
5. SAI GLOBAL reserves the right to withdraw the recognition at any time.

We look forward to a long and mutually beneficial relationship.

Yours faithfully
